

TRZ MEDICATION

WHAT YOU WILL RECEIVE

Vial of Medication
*Refrigerate the vial
immediately upon receipt.*

Medication Syringes

Alcohol Swabs

DOSING AND STEP-BY-STEP INSTRUCTIONS

- STEP 1** Gather supplies (TRZ vial, insulin syringe, alcohol swab).
- STEP 2** Clean the top of the vial with an alcohol swab.
- STEP 3** Insert the medication syringe at a 90° angle into the vial and turn the vial upside down.
- STEP 4** Draw up the exact number of units prescribed by your medical provider.
- STEP 5** Clean your injection site (abdomen, thigh, or back of the arm) with an alcohol swab.
- STEP 6** Pinch the skin at the site.
- STEP 7** Inject the medication at a 90° angle.
- STEP 8** Dispose of the syringe in a sharps-approved container.
- STEP 9** Return the vial to the refrigerator.

BEST PRACTICES

- Always follow the dosing instructions on your prescription label.
- Administer one injection weekly, ideally on the same day and time each week.
- Eat before your injection or within one hour afterward to help minimize side effects.
- Keep the vial refrigerated at all times.
- If you experience severe side effects, call your local clinic immediately.
